

Pneumatic Air Preparation

Desiccant Dryers: Series P3TJA

Regenerative Desiccant Dryers will benefit users who have a specific need for Clean Dry Air (CDA) directly after a compressor, or for a particular application where the air is critical to the operating process or end product. Parkers P3TJA Series of Regenerative Desiccant Dryers is perfect for such requirements.

With applications ranging from coordinate measuring machines and packaging machines to processing equipment and conveying machines, there is a style that is right for your need!

The Benefits are Obvious:

- **Point Of Use Application**
 - Bringing Clean Dry Air just where you need it.
- **Approved to International Standards**
 - Designed in accordance with ASME VIII Div.1, approved to CSA/UL/CRN and fully CE Marked (PED, EMC, LVD) as standard.
- **Simple to Install**
 - Flexible installation utilizing the multiple in-line inlet & outlet connection ports.
- **Compact and Lightweight**
 - Can be Floor, Bench or Wall / Canopy mounted.
- **Can Be Installed Almost Anywhere**
 - IP66 / NEMA 4 protection as standard.
- **Audible Alarm**
 - Indicating service intervals.
- **Simple & Easy To Maintain**
 - Due to the quick release top cap arrangement, maintenance can be achieved in under 15 minutes.

A Regenerative Desiccant Dryer System Installed to Supply Control Air for a CNC Machining Center.
