

NEXGEN Tube & Hose

Your Go-To Solution

Parker NEXGEN® offers a line of standard and custom thermoplastic hose and tubing to meet the constantly changing requirements of today's diverse marketplaces. From development to production, sales to cost effective shipping, Parker Nexgen applies its experience and state-of-the-art processes to deliver the "next generation" of hose and tubing solutions.

Parker Nexgen has earned a reputation as the "go to" company for hose and tubing solutions. When you select the Parker Nexgen you are assured of innovative, value-added products backed by outstanding service and support.

TUBING (NON-REINFORCED):

Whether your tubing demands require PVC, EPDM TVP or ester based polyurethane construction, Checker and Parker Nexgen have you covered. From clear or colored general purpose tubing and fire resistant tubing to pure water and beverage tubing, there is a tube available to suit your specific application requirement.

HOSE (REINFORCED):

Parker Nexgen's range of low pressure hose is second to none and can meet a wide range of applications. Clear PVC can be used in general air and water applications, beverage dispensing or light vacuum. For more specific applications, we have chemical spray hose, food grade and pure water hose, and golf course water hose. No matter what the application, Parker Nexgen has a hose to suit your needs.
